Bristol Bay in the News, March 28, 2013

Commercial fishermen took to Capitol Hill last week for meetings with Congressional representatives and agencies to deliver the message that they will stand up and fight for their jobs, industry and investments. They also discussed the substantial economic benefits and revenues that flow from Bristol Bay's commercial salmon fishing industry down to the West Coast and across the country.

"Our message was well received, and we look forward to converting our growing congressional support into substantial action and the publication of the final Bristol Bay Watershed Assessment," writes fisherman Ben Blakey in a blog post.

An op-ed in the Juneau Empire refutes the Pebble Partnership's frequent refrain that it has no mine plan to criticize, countering their claims by citing company presentations, reports, press releases, water rights application, advertising and more. They say there's enough information about "the location, size and geochemical makeup of the deposit, water use, power needs, waste, etc. to have an honest conversation about the impacts of large-scale mining in Bristol Bay."

The authors write: "The Pebble Limited Partnership's approach to the Bristol Bay Watershed Assessment is an insult to the intelligence of Alaskans. They say the assessment is based on a "fantasy mine plan" and that "no mining plans exist," claiming that EPA's findings are invalid. If that were the case, the state of Alaska should immediately drop Pebble's water rights application and priority date until there is a plan."

Finally, there were a number of stories about the Orvis Company's commitment to protecting Bristol Bay. The Vermont-based gear maker and clothing company has pledged to match donations up to \$50,000 to help protect Bristol Bay's clean waters, fish and wildlife habitat.
